

# TreeFlex

## Tree Protection – Flexible and Self-Supporting

### EXPO-NET TreeFlex

EXPO-NET Danmark A/S has a broad range of environmentally friendly tree guards designed to protect young trees and shrubs.

One of the most recently developed types is the TreeFlex – a lightweight, black tree guard manufactured from PPH.

*Easy to fit*

The TreeFlex offers effective protection of tree trunks of up to 15cm in diameter and it is very easy to fix.

### Properties:

- \* Vertical slit – Easy to fit around tree trunks
- \* Flexible – Diameter expands to accommodate the growth of the tree
- \* Grips the trunk of the tree – No need for fasteners or ties
- \* UV Stabilised – Long lasting even with high sun exposure

- \* Easy to apply and remove – Can be reused
- \* Small aperture – Prevents branches from growing through the guard.
- \* Allows air and light to pass through – Encouraging good tree growth.

### Advice and Guidance:

For further advice and guidance, we recommend that you visit our website: [www.expo-net.com](http://www.expo-net.com) or please do not hesitate to contact our sales office either by phone or e-mail.
