

Filtration Nets & Meshes

Polymeric Nets, Cores and Cages for Support and Reinforcement

EXPO-NET's Extruded Filtration Cores, Cages, Nets and Meshes

EXPO-NET – provide a collection of advanced extruded polymeric products for the filtration industry.

We have an extensive range of high performance extruded products, which enhance the performance of our customers' filtration elements.

We continue to invest in our state of the art manufacturing facilities, engineering and technical departments, situated in Denmark.

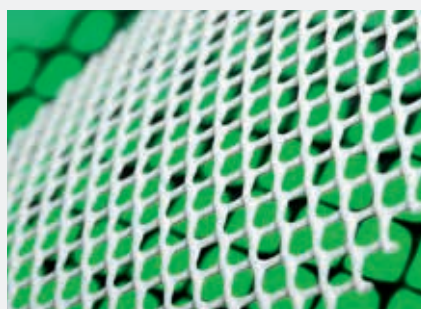

Complemented by our European wide sales offices, offering exceptional customer service and support.

Product Categories

Our range of filtration products is classified into 3 groups –

- Cores and Cages
- Cartridge Sleaving
- Filtration Nets and Meshes

Please see overleaf.

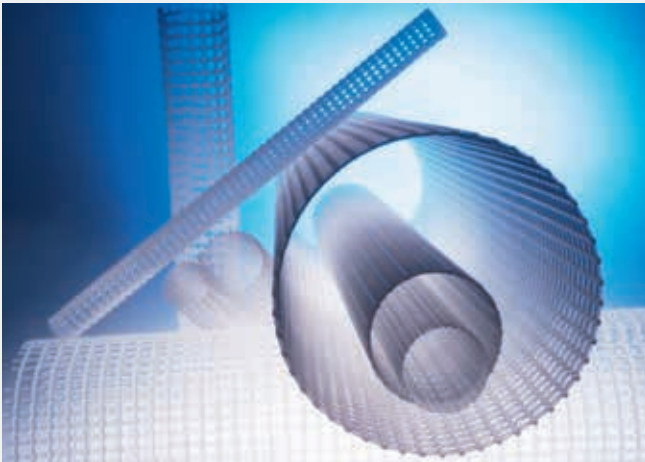

Product Properties

EXPO-NET products are widely used within the manufacture of filter cartridges and offer the following advantages –

- High strength
- Inert
- Clean and easy to use
- Non corrosive
- Incinerable
- Re-cyclable
- High chemical resistance
- Dimensionally stable
- Silicone free
- All polymer meet FDA Standards

For further technical or commercial Information, please contact our sales department or visit our website: www.expo-net.com

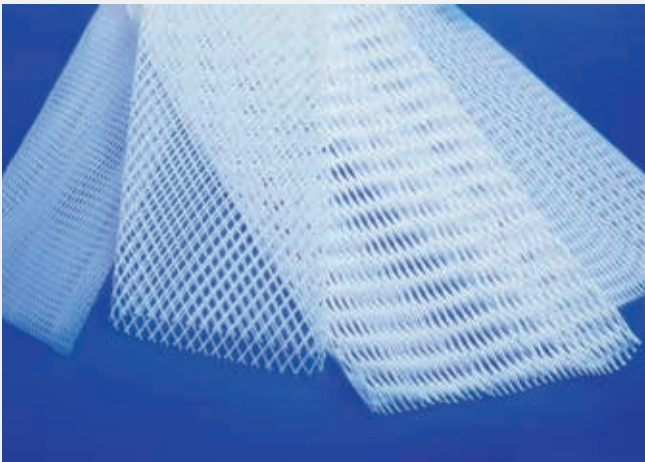

EXPO-NET Cores and Cages

EXPO-NET Rigid Filtration Cores and Cages provide structural support for fluid and air filter cartridges.

Supplied in a broad range of diameters, lengths and with a variety of open area.

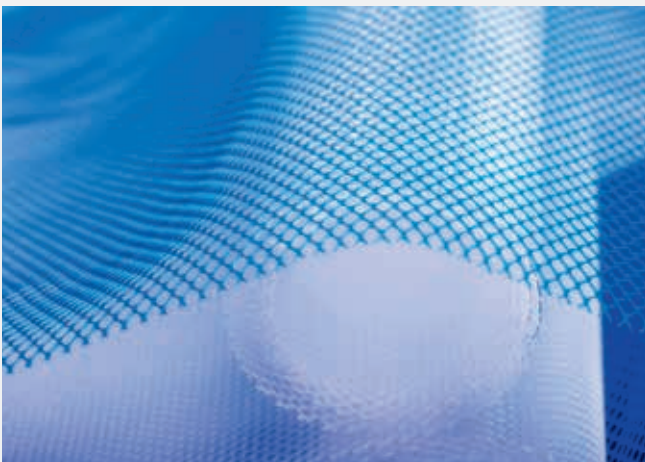

Ideal for filter cartridges which are utilised for the filtration of fluid and air in applications such as – industrial, automotive, aerospace pharmaceutical, oil, water, food and beverage.

EXPO-NET Cartridge Slewing

EXPO-NET Cartridge Slewing offers a flexible cost effective outer protection for cartridge filters. Providing ease of handling and/or identification.

Available in an expansive range of diameters, various aperture sizes and weights. The sleeves can be cut to length or supplied in reel form. Supplied in natural or a wide range of colours.

EXPO-NET Filtration Nets and Meshes

EXPO-NET Diamond, Square and Trellis Flat Nets are used for a variety of applications. They are commonly used as pleat support meshes to add support and separation. In addition they can aid spacing and drainage in many processes.

Available in various polymers, widths, thicknesses and mesh sizes. Often supplied as bespoke nets to match our customers' exact requirements.
