

Rigid Cores and Outer Cages

EXPO-NET Rigid Cores and Outer Cages

EXPO-NET rigid filtration cores and cages are used within the production of filtration cartridges. The cartridges are utilised for the filtration of fluid and air in applications such as - industrial, oil, water, pharmaceutical, food and beverage.

Internal Support Cores – Offer strength and rigidity to the filter cartridge.

Outer Cages – Add strength whilst protecting the filter media.

Properties:

- High strength
- Inert
- Clean and easy to use
- Non corrosive
- Incinerable
- Re-cyclable
- High chemical resistance
- Dimensionally stable
- Operating temperatures from -40° C to +120° C
- Polymers meet the requirements of the FDA
- Silicone free

Features and Sizes:

- Length – Customer specific lengths
- Diameters – Broad range of diameters from 28mm id
- Thickness – Range of wall thicknesses
- Open area – Various aperture sizes
- Colour – Natural

EXPO-NET offer a high quality product backed by exceptional service. For further information on these or any of our products please contact us.
