

Biodegradable Netting

Tubular Extruded Nets

Biodegradable Nets for Food Products:

To meet the needs and environmental challenges our customers are facing, EXPO-NET Danmark A/S have developed a range of biodegradable nets.

These eco-friendly nets complement our existing range of packaging nets, which are designed for packing of a vast number of fresh food including fruit, vegetables, nuts and shell fish.

BRC Packaging Certified Nets:

EXPO-NET's extruded packaging nets are manufactured in our state of the art factory in Denmark to BRC standards.

Through investment, innovation and manufacturing excellence EXPO-NET Danmark A/S has become one of Europe's leading suppliers to the packaging industry to which we supply standard as well as customised products.

Compost Conformity:

Compostable means that a product is capable of disintegrating into natural elements in a compost environment, leaving no toxicity in the soil.

Our biodegradable nets are manufactured from polymers which have certified biodegradability and compostability (conforming to European Standard EN 13432).

Details about the Nets:

The nets are designed to run with optimum efficiency with all types of packaging machinery – both fully and semi-automatic.

Our tubular extruded nets are usually supplied in bulk reels, and they are wound with even tension for ease of use when packaging the food.

The light-weight nets are robust and versatile. They are available in a variety of colours, widths, lengths and shapes with various aperture sizes – and can be

supplied in reels, cut to length or as a bag welded at one end.

For more information regarding your needs and the suitability of our degradable netting for your application, please contact us or visit our web site:
